MEMORANDUM FOR THE RECORD

SUBJECT: Proposed [] (Draft B), Dissemination of
Non-CIA Produced Cables and Telegrams

1. The maintenance of a log of all non CIA produced TOP SECRET cables (per para. 4a(4) of the proposed regulation) was discussed today with Mr. [] Top Secret Control Officer. It was his opinion that ultimately a standard log form should be developed. However, for the present, individual log systems are proving satisfactory. In some cases, for example, copies of document receipts are used.

2. Mr. [] pointed out that by precedent the Cable Secretariat has taken the initiative in prescribing procedures for controlling the dissemination of cables. He recommends that this arrangement continue, at least until the revised TS Control System is tested.
